

BBPayroll

We are a full-service payroll administrator

We love to create benefit programs

BBPayroll has been in business since 1977. Not only do we retain clients, we also retain our employees who stay with us on average for over 10 years. We have learned two fundamental business practices along the way – treat each client as if it was your very first customer and always provide the very best service. Our clients appreciate our payroll services and payroll software along with our customer service.

We create the perfect balance of technology and the human touch.

From the onset of starting the relationship, BBPayroll believes in reviewing risk, workflow, compliance, technology and service. From onsite solutions, to payroll consulting or from administration of basic payroll to our ASO model, we have the service plan for your company's needs. We offer payroll services, technology and consulting for every industry, every size and every type of company.

Payroll Services

Our web-based payroll software is a state-of-the-art product for your payroll, time & attendance and HRIS needs. From pre-hire to retire, our system allows you to control it all in a paperless format. The full suite of services offered includes benefit enrollment, performance appraisal, time and attendance, recruitment, career and talent development, e-mail notification, carrier feeds, workforce management, and employee and manager self-service.

Time & Attendance

You can keep your own system, use an onsite solution or use one of our other vendors. BBPayroll will consult and set-up the integration so that the process is seamless with our payroll system. There is no reason to manually track time anymore or use inferior outdated systems. Our solutions will help speed up the payroll process and accuracy of your labor force.

HRIS

Our integrated human resources (HR) software simplifies the way you hire and onboard new employees. From sending offer letters to letting new hires onboard themselves before their first day—it's all done online, in one place, in minutes. The result is a dramatic reduction in administrative busy work and employees who feel more empowered.

Compliance

The laws that govern benefits, HR and payroll are complex so let BBPayroll keep you in compliance. For all businesses, ACA compliance is a time-consuming and potentially costly concern. BBPayroll helps you navigate the complexities of these regulations by proactively keeping you up-to-date and handling most requirements, even small missteps can result in not-so-small penalties.
